

Evolution Changes

Pokémon that would normally need to be traded to evolve now have an additional evolution method. As a quick summary, Pokémon that don't need to hold an item when traded will evolve via happiness, while those that do need an item will evolve by levelling up while holding that item.

Also, please note that not all Rockruff can evolve into Dusk Lycanroc; only the ones with Own Tempo can do this, and they must have the ability when they are caught (you can't get it with an ability capsule).

All changes are as follows:

- Eevee => Glaceon: Use an Ice Stone
