

# Important Trainers: Rebalanced Version

This document includes detailed team information for every important opponent in the game, including Trial Captains, Kahunas, assorted Villains, and even a couple of Battle Legends. All useful information except for Natures and EV spreads is included. As this is the version of the hack where some Pokémon have **new moves and abilities**, these have been **highlighted in red**.

<sup>1</sup> Ghetsis' Hydreigon has an illegal EV spread, with 252 EVs in every stat except Attack. This was done as a crude attempt to make it as challenging to fight as it was in Black and White, where it was a significantly higher level than the player's team. It was also underlevelled, so Ghetsis cheating is nothing new!
