

# Pokémon Changes

(Rebalanced Versions Only)

These versions feature all the usual things you'd expect in this sort of ROM hack; namely type, stat, movepool and ability changes intended to make many Pokémon more useful. A few changes are shamelessly copied from other hacks, including Drayano's Grass/Dragon Serperior and luuma's Psychic Fangs Ariados. Stat changes, however, are usually original. Some stat changes may appear to be small, but keep in mind that some of them will be further amplified by the growth changes listed below.

## EXP/Growth Changes:

Many weaker Pokémon, as well as all Pokémon in the fluctuating and erratic experience groups, have been moved to different growth groups so that they require less (or more) EXP to level up. This means that some weaker Pokémon will have a significant level advantage over opposing trainers for part of the game (which effectively increases all of their stats). Conversely, a few Pokémon in the fast experience group have been moved to medium fast. This prevents them from breaking the game by being strong *and* 20 levels higher than the opponent's Pokémon.

The following Pokémon lines have been moved to new experience groups:

**Fast (800,000):** Drifloon, Gulpin, Seviper, Illumise, Carnivine, Stantler, Tropius, Relicanth, Caterpie, Weedle, Rattata, Paras, Farfetch'd, Drowzee, Goldeen, Sentret, Bonsly, Girafarig, Qwilfish, Slugma, Poochyena, Wurmple, Plusle, Minun, Castform, Krieketot, Burmy, Pachirisu, Cherubi, Patrat, Maractus, Heatmor, Dedenne, Numel, Swablu, Zangoose, Makuhita, Wailmer, Sheldon, Dunsparce.

**Medium Fast (1,000,000):** Anorith, Clamperl, Cranidos, Feebas, Lileep, Nincada, Volbeat, Exeggcute, Carbink, Rufflet, Vullaby, Chinchou, Mantyke, Miltank, Tauros, Vanillite, Corphish, Shroomish, Azurill, Aipom, Minccino, Cleffa, Duskull, Snubbull, Spoink, Klefki, Mawile, Misdreavus, Munna, Togepi, Wishiwashi

## Movepool Changes:

- Because Sucker Punch is now a TM move, some generation five, six and seven Pokémon that wouldn't normally learn the move now have access to it. Any Pokémon that can normally learn Sucker Punch is also compatible with the TM. The following Pokémon now learn Sucker Punch:  
Patrat, Watchog, Woobat, Swoobat, Palpitoad, Seismitoad, Cottonee, Whimsicott, Sandile, Krokorok, Krookodile, Dwebble, Crustle, Scraggy, Scrafty, Yamask, Cofagrigus, Trubbish, Garbodor, Foongus, Amoonguss, Frillish, Jellicent, Accelgor, Stunfisk, Vullaby, Mandibuzz, Froakie, Frogadier, Greninja, Litleo, Pyroar, Pancham, Pangoro, Inkay, Malamar, Binacle, Barbaracle, Skrelp, Dragalge, Klefki, Phantump, Trevenant, Pumpkaboo, Gourgeist, Noibat, Noivern, Litten, Torracat, Incineroar, Yungoos, Gumshoos, Fomantis, Lurantia, Salandit, Salazzle, Stufful, Bewear, Sandygast, Palossand, Mimikyu, Bruxish, Dhelmise, Tapu Koko, Tapu Lele, Tapu Bulu, Tapu Fini

- The new TM60 Aura Sphere is compatible with **any** Pokémon that is compatible with TM52 Focus Blast, as well as those that normally learn the move through any means.
- The new TM79 Freeze-Dry is compatible with all Ice-Type Pokémon (and nothing else).
- The new TM100 Curse is compatible with any Pokémon that can learn TM moves.
- The new TM67 Rock Climb (which is now a Rock-Type move) is compatible with any Pokémon that could normally have the move, as well as the following Pokémon: Emboar, Samurott, Watchog, Stoutland, Simisage, Simisear, Simipour, Roggenrola, Boldore, Gigalith, Timburr, Gurdurr, Conkeldurr, Seismitoad, Throh, Sawk, Darmanitan, Dwebble, Crustle, Carracosta, Archeops, Axew, Fraxure, Haxorus, Beartic, Golett, Golurk, Deino, Zweilous, Hydreigon, Cobalion, Terrakion, Virizion, Reshiram, Zekrom, Chespin, Quilladin, Chesnaught, Diggersby, Pyroar, Skiddo, Gogoat, Pangoro, Furfrou, Slurpuff, Barbaracle, Tyrunt, Tyrantrum, Aurorus, Incineroar, Gumshoos, Crabrawler, Crabominable, Mudbray, Mudsdale, Araquanid, Bewear, Passimian, Golisopod, Type: Null, Silvally, Turtonator, Jangmo-o, Hakamo-o, Kommo-o, Tapu Koko, Tapu Bulu, Solgaleo, Buzzwole, Guzzlord, Stakataka, Zeraora
- Some Pokémon also have access to event moves and/or move tutors from previous games e.g. Sludge Bomb Zoroark, Surf Pikachu, Body Slam Tauros
- Most Pokémon learn egg moves by levelling up, so you can avoid the awful breeding system.
- All the fully-evolved Unova, Kalos and Alola starters are now compatible with TM26 Earthquake.
- These changes are not listed below.

### **Sword and Shield Update:**

Pokémon Sword and Shield made a lot of interesting additions to movepools, and many of the better ones have now been added to Photonic Sun/Prismatic Moon! Any moves added as part of this update are listed with two asterisks (\*\*) next to them so you can skim through the new stuff (use ctrl +F!).

A few of the new moveset additions were in the hacks already, so it's nice that they're now official!

### **Ability Changes:**

- The Litten line and all Fossil Pokémon now have their Hidden Ability available as one of their two regular abilities.
- New abilities are listed below in **bold** text, while *italic* text denotes a hidden ability.

All changes made are as follows (you can use ctrl + f to find a specific Pokémon faster):

		HP	Atk	Def	SpA	SpD	Spe
