

Wild Pokémon Locations

This document contains the encounter rates for each area with wild Pokémon in the games. Areas are listed roughly in the order that they become accessible. There are no version exclusives or differences, so this applies to both games; all 807 Pokémon can be obtained in either version. If a Pokémon isn't listed here, it's probably a Legendary and will have its location listed in the Special Encounters document instead. **Use ctrl + f to find specific Pokémon quickly!**

Because each patch of grass in the Generation VII games has its own encounter table, each route boasts a massive variety of Pokémon to catch (though I tried not to go overboard with this!). This document includes maps of most areas that take advantage of this feature, which show exactly which patches of grass contain which Pokémon. Circled numbers on the maps are grass patches that correspond to tables labelled “Grass 1”, “Grass 2”, etc. as shown in the map of Route 1 below.

Some areas will also have a few encounters that change based on time of day; these are shown using colour coded text and columns (“inspired” by Bulbapedia’s system). The first column shows a Pokémon’s encounter rate during the day, while the second column shows its encounter rate at night:

Grass 1		
Levels: 2-3		
Species	Rate (%)	
Yungoos	20	0
Rattata	0	20

Finally, any Kantonian forms of Pokémon with Alolan forms are listed in red text. Most of them can be found via SOS battles with their respective Alolan forms.

Vast Poni Canyon SOS Calls

Species	Ally
Machoke	Machamp
Dartrix	Decidueye
Torracat	Incineroar
Hakamo-o	Kommo-o
Zweilous	Hydreigon
Carbink	Diancie**
Carbink	Sableye**
Golbat	Crobat
Boldore	Gigalith
Dugtrio	Dugtrio
Durant	Heatmor
Dragonair	Dragonite***

*Lycanroc-Midday will appear during the day, while Lyncanroc-Midnight will appear at night. Both have a small chance to call Lycanroc-Dusk.

**Diancie and Sableye will only be called by Carbink encountered in caves. Diancie is very rare, though not as rare as the Salamence on Route 3.

***Dragonite is much more likely to be called by a Dragonair encountered in a bubbling spot.
